

DEEP SUN – SYMPHONIC METAL FROM SWITZERLAND

Formed in Switzerland in 2006, Deep Sun combine powerful metal riffs, epic orchestration and melodic female vocals with emotional storytelling and an energetic live presence. Their music moves between light and darkness, cinematic atmosphere and driving metal, creating a distinctive sound rooted in modern symphonic and power metal.

Over the years, Deep Sun have developed from a local Swiss band into an internationally active live act, performing club shows and festivals across Europe. Their catalogue combines highly symphonic material with powerful, melodic songs designed to come alive on stage.

In 2025, Deep Sun released "Storyteller", further developing the band's current sound and musical identity. In 2026, the band captured another important chapter of their journey with their first official live album, "Deep Sun Live @ Olten."

Recorded on March 28, 2026 at Schützi Olten, Switzerland, the live album features ten songs from different stages of Deep Sun's career. The running order follows the original concert set and includes songs such as "Storyteller," "United Force," "The Window," "Worship The Warship," "Living The Dream" and "Euphoria."

For Deep Sun, the album is more than a collection of live versions. It captures the energy and interaction between band and audience that can only exist during a concert.

"There are moments on stage that simply cannot be planned in the studio. That energy, the connection between band and audience and the emotions of the night are exactly what we wanted to preserve with this album."

Debora Lavagnolo – Vocals

The project was also made possible with the support of the band's community, the Deep Sunlights, who helped finance the production through crowdfunding.

"Without the support of our Deep Sunlights, a production on this scale would not have been possible. That is why this live album feels like a shared project with the people who have accompanied Deep Sun for years."

Tobias Brutschi – Drums & Management

Mixing and mastering of "Deep Sun Live @ Olten" were handled by Frank Pitters / Silverline Music, with video production by Steve Diener / afroxfilm.

Deep Sun continue to perform throughout Europe and are available for club shows, festivals and support opportunities.
